# ARCHAEOLOGICAL PROCESS

**Modified T/F** - First, indicate whether each statement is true or false on the line. Then, correct any false statement by crossing out the incorrect part and replacing it with the correct information.

- \_\_\_\_\_ 1. Archaeologists spend most of their time digging up dinosaur fossils.
- \_\_\_\_\_ 2. Archaeologists are allowed to dig anywhere as soon as an artifact is found there.
- \_\_\_\_\_ 3. Once a site is prepared to be dug, the first thing archaeologists do is create a grid.

**Fill in the Blank** – Write a word that correctly completes the sentence on the line.

4. An object that has been made by humans is called a \_\_\_\_\_.
5. Examples of \_\_\_\_\_ include bones, imprints, and petrified wood.
6. Archaeologists look for potential sites where rivers flow into the ocean because there is likely to have been \_\_\_\_\_ and access to trade routes.

**List** – No complete sentence required

7. List three ways archaeologists locate potential dig sites.
8. List five tools archaeologists use to carefully remove items from a dig.
9. List two ways archaeologists record their findings.
